Post-Polio

Support Group

Newsletter - December 2016

As we come to the close of 2016, we can look back on the 100th anniversary of the first large polio outbreak in the United States. There were about 27,000 cases that year, and the death rate was approximately 25 percent. There were many outbreaks in subsequent years, but the death rate didn't go down until the introduction of machines to assist breathing for critically ill polio patients.

Come and see one of the medical marvels of the 20th century!
